IN THE SPECIFICATION

Please amend the specification by replacing paragraph 0103 on pages 39-40 with the following:

-- The present invention also provides a kit for detecting or identifying HH or amaemia comprising: a) means for collecting a sample of ~~breast epithelial cells~~; b) means for detecting an inhibitor of phospholipase A.sub.2, such as ~~uteroglobin~~, in the sample of ~~breast epithelial cells~~; and c) at least one reference which correlates to the amount of inhibitor of phospholipase A.sub.2 in normal ~~breast epithelial cells~~ or in metastatic breast cancer cells, wherein differential amounts of the inhibitor of phospholipase A.sub.2 between the sample and the reference detects or identifies ~~metastatic breast cancer~~ HH or amaemia.--
